1.MOVIE REVIWE AND RATING WEBSITE.

1. Definition

Web development is the process of designing and developing websites using web technologies such as HTML and CSS. HTML (HyperText Markup Language) provides the basic structure and content of a webpage, whereas CSS (Cascading Style Sheets) controls its appearance, layout, colours, spacing, and typography.

A Movie Review Website is a web application that presents movie-related information, including posters, genres, release dates, directors, cast members, story summaries, ratings, and reviews, in an organized and user-friendly format.

2. Explanation

The Movie Review Website is developed using HTML and internal CSS. The website is divided into several sections to provide clear navigation and an organized presentation of movie information.

A. HTML Components

1. **Header:** Displays the website title and introductory information.
2. **Navigation Bar:** Provides links to the Home, Movies, Reviews, and About Us sections.
3. **Welcome Section:** Introduces the purpose and features of the website.
4. **Movie Cards:** Display movie posters, titles, genres, release dates, directors, cast members, story summaries, ratings, and critic reviews.
5. **Reviews Section:** Explains the important factors used to evaluate a movie, such as story, acting, music, and direction.
6. **About Us Section:** Describes the purpose and objectives of the website.
7. **Footer:** Displays the website name and year.

8. **B. CSS Styling Properties**

The following CSS properties are used to improve the appearance and layout of the webpage:

- background-color: Sets the background colour of elements.
- color: Specifies the text colour.
- font-family: Defines the font used on the webpage.
- text-align: Aligns text horizontally.
- margin: Creates space outside an element.
- padding: Creates space inside an element.
- display: inline-block: Arranges movie cards horizontally when sufficient space is available.
- border-radius: Creates rounded corners.
- box-shadow: Adds shadow effects to movie cards.
- width and height: Specify the dimensions of elements.
- vertical-align: Aligns inline-block elements vertically.

C. Working Principle

HTML defines the structure and content of the website, while CSS styles the individual sections and movie cards. Navigation links use HTML anchor elements to move users to the corresponding sections of the same webpage. Movie posters are displayed using image elements with online image sources.

3. Code

```
<!DOCTYPE html>

<html>

<head>

  <title>Movie Review Website</title>
```

```
<style>
  body {
    font-family: Arial, sans-serif;
    background-color: #f2f2f2;
    margin: 0;
  }

  header {
    background-color: #222;
    color: white;
    text-align: center;
    padding: 25px;
  }

  nav {
    background-color: #444;
    padding: 15px;
    text-align: center;
  }

  nav a {
    color: white;
    text-decoration: none;
    margin: 15px;
  }
```

```
h2 {
    text-align: center;
    color: #333;
    margin-top: 30px;
}

.movies {
    text-align: center;
    padding: 15px;
}

.movie {
    display: inline-block;
    width: 240px;
    background-color: white;
    margin: 15px;
    padding: 15px;
    border-radius: 10px;
    box-shadow: 0 3px 8px #ccc;
    vertical-align: top;
}

.movie img {
    width: 100%;
```

```
    height: 280px;
    border-radius: 8px;
}

.movie h3 {
    color: #6a1b9a;
}

.movie p {
    font-size: 14px;
    line-height: 1.5;
}

.rating {
    color: #d68a00;
    font-weight: bold;
}

.about {
    background-color: white;
    margin: 25px;
    padding: 20px;
    border-radius: 8px;
    line-height: 1.7;
}
```

```
    footer {
      background-color: #222;
      color: white;
      text-align: center;
      padding: 20px;
      margin-top: 25px;
    }
  </style>
</head>

</body>
</html>
```

4.OUTPUT

5. Conclusion

Thus, the Movie Review Website was designed and developed successfully using HTML and CSS. This experiment demonstrates the use of HTML structural elements, navigation links, images, text formatting, CSS styling properties, and inline-block layouts to create an organized and visually appealing webpage. It also provides practical knowledge of designing a basic website with multiple sections and reusable content cards.

2.gaming and esports community website

1. Introduction

The aim of this project is to design a simple Gaming and Esports Community Website using HTML and CSS. The website provides information about popular games, tournament schedules, top players, and gaming news.

HTML is used to create the structure of the webpage, while CSS is used to add colors, spacing, alignment, and styles. This website helps gaming enthusiasts explore games and stay informed about esports activities.

2. Explanation

The website consists of the following sections:

1. Header: Displays the website title and a short description.
2. Navigation Bar: Provides links to Games, Tournaments, Players, and News sections.
3. Popular Games: Displays game names, genres, platforms, and descriptions using cards.
4. Tournament Schedule: Uses an HTML table to display tournament names, games, and dates.
5. Top Players: Displays player rankings, names, and points in a table.
6. Gaming News: Shows updates about tournaments and esports teams.
7. Footer: Displays the website name at the bottom of the page.

HTML tags and CSS properties used:

- <header> – Defines the top section of the webpage.
- <nav> – Creates the navigation bar.
- <a> – Creates navigation links.
- <h1>, <h2>, <h3> – Display headings.
- <p> – Displays paragraphs.
- – Groups related content into sections or cards.

- <table>, <tr>, <th>, <td> – Create tables.
- <footer> – Defines the bottom section of the webpage.
- background-color – Sets the background color.
- padding and margin – Control spacing.
- text-align – Aligns text.
- border-radius – Rounds the corners of cards.
- display: inline-block – Places game cards next to one another when space allows.

3. Code

```
<!DOCTYPE html>
<html>
<head>
  <title>Gaming Community</title>

  <style>
    body {
      font-family: Arial;
      background-color: #eeeeee;
      margin: 0;
      text-align: center;
    }

    header {
      background-color: #222222;
     color: white;
      padding: 20px;
    }

    nav {
      background-color: #444444;
      padding: 12px;
    }

    nav a {
      color: white;
      text-decoration: none;
```

```
      margin: 10px;
    }

    h2 {
      color: #333333;
    }

    .game {
      display: inline-block;
      background-color: white;
      width: 220px;
      margin: 10px;
      padding: 15px;
      border-radius: 8px;
    }

    table {
      margin: 20px auto;
      width: 80%;
      border-collapse: collapse;
      background-color: white;
    }

    th, td {
      border: 1px solid #cccccc;
      padding: 10px;
    }

    th {
      background-color: #333333;
      color: white;
    }

    footer {
      background-color: #222222;
      color: white;
      padding: 15px;
    }
  </style>
</head>
```

```

```

4.output

5. Conclusion

Thus, the Gaming and Esports Community Website was successfully designed using HTML and CSS. This project demonstrates the use of basic HTML elements, tables, navigation links, div elements, and CSS styling properties. It provides a simple and organized platform for displaying gaming information and esports updates.

3. STUDENT ACADAMIC DASHBOARD

1. Introduction

The aim of this project is to design a Student Academic Dashboard using HTML and CSS. The website displays student details, attendance percentage, semester results, examination schedules, and important announcements.

HTML is used to create the structure of the webpage, while CSS is used to style the webpage with colors, spacing, alignment, cards, and tables.

2. Explanation

The website consists of the following sections:

1. Header: Displays the title “Student Academic Dashboard” and a welcome message.
2. Navigation Bar: Contains links to Profile, Attendance, Results, Exams, and Announcements.
3. Student Details: Displays the student's name, course, and semester using cards.
4. Attendance: Shows the overall attendance percentage.
5. Semester Results: Displays subject names, marks, and grades in a table.
6. Examination Schedule: Shows the subjects and examination dates.
7. Announcements: Displays important academic notices.
8. Footer: Displays the name of the dashboard at the bottom of the webpage.

HTML tags and CSS properties used:

- <header> – Defines the header section.
- <nav> and <a> – Create the navigation bar and links.
- <h1>, <h2>, <h3> – Display headings.
- <p> – Displays text and information.
- – Groups related content into cards and notice sections.
- <table>, <tr>, <th>, <td> – Create tables for marks and exam schedules.
- <footer> – Defines the bottom section.
- background-color – Sets background colors.
- text-align – Aligns text.
- padding and margin – Provide spacing.
- border-radius – Rounds the corners of cards.
- display: inline-block – Arranges cards side by side.

3. Code

```
<!DOCTYPE html>
<html>
<head>
  <title>Student Dashboard</title>

  <style>
    body {
      font-family: Arial;
      background-color: #f2f2f2;
      margin: 0;
    }

    header {
      background-color: #2c3e50;
      color: white;
      text-align: center;
      padding: 20px;
    }

    nav {
      background-color: #34495e;
      padding: 12px;
      text-align: center;
    }

    nav a {
      color: white;
      text-decoration: none;
      margin: 10px;
    }

    .card {
      display: inline-block;
      background-color: white;
```

```
    width: 200px;
    padding: 15px;
    margin: 10px;
    text-align: center;
    border-radius: 8px;
}

h2 {
    text-align: center;
    color: #2c3e50;
}

table {
    width: 80%;
    margin: 20px auto;
    border-collapse: collapse;
    background-color: white;
}

th, td {
    border: 1px solid #ccc;
    padding: 10px;
    text-align: center;
}

th {
    background-color: #34495e;
    color: white;
}

.notice {
    background-color: white;
    margin: 15px auto;
    padding: 15px;
    width: 75%;
    border-left: 5px solid #3498db;
```

```
    }

    footer {
      background-color: #2c3e50;
      color: white;
      text-align: center;
      padding: 12px;
    }
  </style>

```

4. Output

5. Conclusion

Thus, the Student Academic Dashboard was successfully designed using HTML and CSS. This project demonstrates the use of HTML elements, navigation links, tables, cards, and CSS styling properties. It provides a simple and organized way to display important student academic information on a single webpage.
